

The 7th & 8th grade science classes are participating in an Engineering Design Fair. For this, each student had to choose a project to build, and if they met certain criteria, they would continue on to participate in the Oklahoma Engineering Design Fair at the Science Museum of Oklahoma. For these projects students will need various materials. I was hoping some of these supplies would be things you have at home and wouldn't mind donating to these projects. I have included a list of the items needed that you can find at your home. I have also created an Amazon Wish List for items that can be purchased from Amazon.

Thank you,

Sarah Barron

ITEMS NEEDED

Short pieces of scrap lumber - 1x and 2x about 12" long

Bread wrapper wires (twist ties)

Garbage bag ties

2 lightweight tennis rackets

Copper wire pieces (2'-3' long)

2 switches (out of an old electric tool)

Battery tray (out of old toy)
